

# Orion I

Gazpacho

We're on our way  
Almost surreal  
I feel my hands  
Numb on the wheel

You smile at me  
I love you so  
The mountain rests  
In winter snow

The night is cold  
I smile at you  
The dark's not dark  
But midnight blue  
We are at peace  
Under gentle stars  
And the shadows will be drawn in the invisible dawn  
It's fading

You know you've seen him in your sleep  
His eyes are pebbles in the deep  
Orion's glowing fire  
Burning in your deepest dreams  
I stop the car and kill the lights  
There's someone in the winter night  
He's watching you and me  
And I wonder what he sees

The radio's on  
Your breath is warm  
We can not hear  
The coming storm  
That talks about  
All the glory days  
It's all about the one that got away that day

You know you've seen him in your sleep  
His eyes are pebbles in the deep  
Orion's glowing fire  
Burning in your deepest dreams  
I stop the car and kill the lights  
There's someone in the winter night  
He's smiling can't you see  
Looking down at you and me
