Blue

Gemini

'Cause you're lost in front of me It's true I'm losing you (2x)

And you know it's over When you're going down Take everything and live for the moment It's only gonna bring you down tonight

When you're locked up in my view It's true, I love you When you're locked up in my blue It's true, I love you

And you know it's over When you're going down Take everything and live for the moment It's only gonna bring you down

Bring you down (3x)

When I'm lost I'll come to you So blue, I'm feeling you When I'm lost I'll come to you I'm blue, I feel you

And you know it's over When you're going down Take everything and live for the moment It's only gonna bring you down

Bring you down (3x)

And you know it's over When you're going down Take everything and live for the moment It's only gonna bring you down tonight (2x)
