

I Saved Your Place

Gene Watson

Each night I fluff your pillow up beside me
Lay out your favorite gown all trimmed with lace
It may not cross your mind to wonder how things are without you
But if it ever does I saved your place

I hold on to how you used to touch me
When I close my eyes I see your face
It breaks my heart that someone else could make you feel more wanted
But if he lets you down I saved your place

There may come a time when this is all just some old memory
But time's not movin' very fast these days
With all you've got you may not need a fool who really loves you
But if you ever do I saved your place

When he's holding you, you may not need a fool who really loves you
But if you ever do I saved your place
But if you ever do I saved your place
