

She Found The Key

Gene Watson

I like the way that she unlocks my door
To the places that you've never hungered for
You loved me, girl, but not enough to stay
She found the key that you threw away
She found the key that only fits one door
To the room that I wore out walking the floor
You'd be locked out, girl, if you came around today
She found the key that you threw away
She found the key that only fits one door
To the room that I wore out walking the floor
You'd be locked out, girl, if you came around today
She found the key that you threw away
She found the key that you threw away
