

Idle Teratoma Core

General Surgery

Lifeless, stagnated
The idle teratoma core

A neoplasm in overdue removal
How long have you suffered from this tumour?
A fairly stable but abnormal mass
Located in the pelvic cavity

Lifeless, stagnated
The idle teratoma core

The x-ray now revealing
A dead embryonic appearance
It's quite a shock, a perfect spine
Look at that little round skull

The skull...

Lifeless, stagnated
The idle teratoma core

Within the womb
Undelivered foetus,
Failing to be stillborn

Immediate
Surgical procedure
Time for the awaited abscission
