Put A Light On

Generationals

This one wicked road You're gonna make it right You found your way to go You gonna take that right

You're gonna wait too long You're gonna wait till night You're gonna wait too long You're gonna wait till night

Was that the thing you heard? Was that the thing you said? I try to find the way Then maybe walk away!

The miles are way too long The skies are way too bright You know them way too long To run away tonight!

Don't need to fall The way that you go on tonight Cause the light on me and my blue skies playing The light on me and my blue skies playing

The sun will make them dry The sun will make them dry The sun will make them dry The sun will make them dry

This one wicked road You gonna make it right You found your way to go You gonna take that right

You're gonna wait too long You're gonna wait till night You're gonna wait too long You're gonna wait till night
