

Closer To The Light

Gentleman

Verse 1

Have the audacity
To hope and set us free
From all the pain and from the strain
There's too much misery
One drop in the sea
From tone to melody
And from a melody
Into a complex symphony
Behold the mystery
There is so much to see
Behold the seed
How it grows into a mammoth tree
So put aside all your hate and jealousy
This is up to you and me

R:

And Jah will never leave your side no way
Guidance through the night
Protect us from the dutty parasites
We getting closer to the light
Can you see it's getting bright
We done with the wrongs and do the right (repeat)

Verse 2

Time fi release the tension
Talk the words we never mention
Go so then and bun up dem invention
Dem evilous intention
Dem gather up at dem convention
I see dem want decrease people's pension
We all need redemption
From dem oversize clip extension
Tell dem fi put it on suspension
We hafi pay attention
To reach a different dimension
Way beyond dem comprehension

R:

Verse 3

Sometimes you wonder where
But love is always there
Beyond the shadow of a doubt
We know we always care
No matter the atmosphere
We got to be aware
And so we take it and we throw it
In the hemisphere
Whether you far or near
We making this one clear
To all the people in the struggle
And the rush out there
So don't you have no fear
The good is always here
Now is the time to prepare

R:
