

Insurrection

Genuflect

Nothing can change

Oo-rah! come on brothers get ready to fight
A real soldier's always ready to die
Get your glock's cocked
Lock em and load em out out
And don't say nothing cuz your god is your alibi
But my god is my soul; my mentation
And my heart is the pendulum
And my universe exists for one purpose
Make them listen or we end em and lesson learned

We're going to war
What for?
Cuz my god's better than yours

Make way for the confrontational
An infiltration by those ready to die
And nothing can save us
Make way for this gravitation's pull
Elimination in the blink of en eye
And nothing can change who we are

Hell yeah motherfuckers get ready to fight
A true soldier's always ready to kill
Now get them glock's cocked
Lock em and load em out
And don't say nothing cuz your god is what makes you feel
But my god is my soul's lamentation
And my heart is the pendulum
And my universe exists for one purpose
Make them listen or we end em and lesson learned

We're going to war
What for?
Cuz my god's better than yours

Make way for the confrontational
An infiltration by those ready to die
And nothing can save us
Make way for this gravitation's pull
Elimination in the blink of en eye
And nothing can change who we are

Feel my life go over and out
Feel our lives go over and out
Over

From the earth to the sky and to the heavens that want us to keep calm
For the tears in their eyes and for the heavens that want em to keep calm
For the sick and the poor and for the heavens that want us to keep calm
For the rich and this war
We've got the weapons
You want us to keep calm?

We're going to war
What for?

Cuz my god's better than yours

Make way for the confrontational
An infiltration by those ready to die
And nothing can save us
Make way for this gravitation's pull
Back off

It never gives
And never bends
Forever living
Never ending
All i've got to do is just lie

Back off get back back up

None taken alive
