

Looking Glass

Genuflect

You've got a face, you've got a name and people know you
What they don't see is that underneath nobody's there
Yeah, you've got everybody wrapped around your finger
Have you got anybody who really cares?

Looking glass, show me a sign of life
All i feel is emptiness (emptiness)
Hold me back, don't let me go tonight
I just want you to take me home

Out in the dark, all alone, it's almost over
You keep selling your soul on the same road you've been down be
fore
Yeah, you've got everybody looking in your windows
Have you got anybody knocking on your door?

Looking glass, show me a sign of life
All i feel is emptiness (emptiness)
Hold me back, don't let me go tonight
I just want you to take me home

The end is near and we're all gonna die
