

# I Just Wanna Hang Around You

George Benson

You're my heartbeat of life  
And you fill up my mind  
I wanna stay close  
Close to you

It's that old lovers spell  
That you weave oh so well  
It's a hold, holding me  
Oh you've got to see

I just want to hang around you  
Every day and night  
All of my life around you  
Around you

I just want to hang around you  
Every day and night  
All of my life around you  
Hang around you

I get so hypnotized  
When I look in your eyes  
Oh you control  
Control me

I feel all butterflies  
When I'm right here by your side  
I need your touch, can't get enough  
Love me, all you've got to see

I just want to hang around you  
Every day and night  
All of my life around you  
Hang around you

Spending every moment of my life within your gaze  
My forever love to have you and to hold you  
So you never ever need to use your crystal ball  
To know where I'll be, always

I just want to hang around you  
Every day and night  
All of my life around you  
Hang around you  
All I want to do is hang around you

I just want to hang around you  
Every day and night  
All of my life around you  
Hang around you  
All I want to do is hang around you

I just want to hang around you  
Every day and night  
All of my life around you
