My Infinite Love

George Strait

When you see a shooting star in the night When you hear the warm wind whisper through the pines I want you to know

It'll be me and my infinite love for you It's just like I promised you under heaven above It will live on long after we kiss goodbye Forever by your side My infinite love

When you think someone is callin' out your name When you feel that kind of feelin' you can't explain Now you will know

It'll be me and my infinite love for you It's just like I promised you under heaven above It will live on long after we kiss goodbye Forever by your side My infinite love

I want you to know

It'll be me and my infinite love for you It's just like I promised you under heaven above It will live on long after we kiss goodbye Forever by your side My infinite love

My infinite love My infinite love
