

## Second Chances

George Strait

Man don't you know  
This woman you want and crave  
Is the queen of my kingdom  
When she walks through the garden  
Roses drop pedals  
To cushion the foot steps she takes  
I know she once loved you  
And I know you still lover her  
But you carlessly asked for your freedom  
I can see how it hurts you  
But it's too late  
You made your mistakes

Man you know second chances these days  
Are so hard to come by  
I love that lady  
So you best forget  
Ever gettin' her back cause she's mine  
Man you know I had somebody else once  
And she just gave me one try  
And second chances these days  
Are so hard to come by

Man you know second chances these days  
Are so hard to come by  
I love that lady  
So you best forget  
Ever gettin' her back cause she's mine  
Man you know I had somebody else once  
And she just gave me one try  
And second chances these days  
Are so hard to come by

And second chances these days  
Are so hard to come by
