

It's Nothing

Ghost of the Robot

Come on quickly catch me
You really are the best thing that has happened to me since 198
3
You buy into the views of the Hollywood few
Let's kick our feet up, watch the world fall.

You say its nothing uninvited something nothing ever stays fore
ver
When you gonna give me a call
Because you dont know what to do, you follow men in suits who t
ell you Everything is all cool.

Dont act dumb, I know where you're coming from
From the magazines oh you demographic teen
Their statistics are your sickness
Oh I need a witness
Why can't anybody else, see?

You say its nothing uninvited something nothing ever stays fore
ver
When you gonna give me a call
Because you dont know what to do, you follow men in suits, who
tell you Everything is all cool

I want more than this
Something without tricks
Something of my own

I want you to see
Something more than dreams
That ends with being asleep, by the TV screen
sure, they flash and gleam
Make nothing what it seems

Is this really what we,
wanted,
after all?
