

## Southern Witch

### Ghoultown

It was nine o'clock and the pale eye of the moon was high  
When i strapped on my gun and tried to forget the sun  
I heard the daughter of darkness she called my name  
Let no man, good or evil, stand in my way

You got the evil spell  
You took my heart away and locked it up down in hell  
Never let me go  
What is this burnin pain i feel in my soul?

I find her waitin for me beneath the hot spanish sky  
Unveiled and perfect her skin like aztec gold  
From lips of fire i hear the endless song she sings  
Satan's western star has a hold on me

I heard mother mary warn me to stay away  
The touch of holy water burns like acid rain  
But nothin can save me from this fate  
Now that she's shown me her deep dark secret place

Exsequor inritus irritus (fill this void)  
Cum mei carus dolor (with my beloved's misery)
