

This Is My Prayer

Gigliola Cinquetti

This is my pray'r, my only pray'r
When the night comes and all is still
Here, on my pillow, this is my pray'r
That he will care, really will care
When I need him, he will be there
My life to share

Oh, let him love me
When we kiss let a fire start
And let him want me
The way that I want him with all my heart

This is my pray'r, my silent pray'r
All I wish for on ev'ry star
May his arms be never too far
When I awake, may the day bring
For my finger his ring to wear
This is my pray'r, my pray'r

Oh, let him love me
When we kiss let a fire start
And let him want me
The way that I want him with all my heart

This is my pray'r, my silent pray'r
All I wish for on ev'ry star
May his arms be never too far
When I awake, may the day bring
For my finger his ring to wear
This is my pray'r, my pray'r
