

Like the weight he's got to ride on  
On the scene he must came in  
Like the answers to every question  
That's what he needs - They'd understand  
Black man come down  
And sit beside us  
You can share all that we have

And like the stage he's got t play on  
Like the road he's pinning down  
Life attacts him just like a magnet  
Or was that the other way around  
Black man come down  
Come on down and sit beside us  
You are welcomed to all we own

Upside the walls and in the corners  
Of the rooms where we live  
Love is stronger with every heartbeat  
And this love we gladly give  
Just come on down  
And sit beside us  
Can your mind believe your heart  
Black man come down  
Yea, come on down, down
