

# That's Why I Love You

Gilbert O'Sullivan

When I look back on yesterday  
And all the songs we used to play  
The thing that sticks in my mind most  
Is not how badly each one goes  
But what they mean to me  
This one especially

When I'm alone with you it seems all my dreams  
come true  
It makes me feel so good I just can't help loving you  
Cos your everything I could hope for  
That's why I love you

Sometimes I tell myself this girl don't love you no-more  
And that someday with someone new she'll walk from your door  
But if you did my world would break in two  
That's why I love you

And anytime I see your face  
Something very unusual takes place  
All my inhibitions disappear  
Now that you are here
