

Curious Thing

Gin Blossoms

Here goes, who knows she's walking my way
Heading forever and I could die today
For so long, I've worked on finding out her name
Something's happening I just can't explain

I'm attracted to a force of nature
Starts me up just like a generator

She's a world of mystery
She's a curious thing
It's messing with my mind again
She's a curious thing
She's a curious thing

She shines so brightly, radiates on me
Mix me up with secret chemistry
And she'll find me and help me
Tell me what you need from me
There's no denying all these questions fall to me

I'm attracted to a force of nature
Starts me up just like a generator

She's a world of mystery
She's a curious thing
It's messing with my mind again
She's a curious thing
She's a world of mystery
She's a curious thing

Makes you wonder what it feels like
Just the thing that took the cat's life
She always leaves me thinking every time

She's a world of mystery
She's a curious thing
It's messing with my mind again
She's a curious thing

She's a world of mystery
She's a curious thing
It's messing with my mind again
She's a curious thing

She's a curious thing
She's a curious thing
She's a curious thing
Curious thing, curious thing
