Sally (She Says the Sweetest Things)

Gino Vannelli

Sally, she says the sweetest things
But words won't stop the pain
She's painting skies of blue
While I'm standing in the rain

I love her still I always will

Sally, she sings the sweetest songs
But the melody is a lie
She's had a change of heart
I can see it in her eyes

I love her so I can't let go

Save every moment save every hour
Gone are the golden days we knew
Someone is lonely in love with the other
And I'm still in love with you

She was a flower child
When she came into my life
And now the decades gone
And nothings turned out right

The feelings gone but life goes on

Someone is lonely
In love with the other
And I'm still in love with you

Sally, she says the sweetest things
But words won't ever do
You're throwing stones at me
That I can't throw back at you

I love you still
I always will
