

We Came

Girlschool

A rebel angel sits on my shoulder
Telling me of a vision in mind
Garden of Eden of lost pleasures
The original sin of mankind

Of love and danger of human nature
Of inhibitions gone astray
A life of passion the main attraction
A gift of the gods shouldn't be turned away

We came, we saw and grew stronger
We came, we saw and grew stronger

Words of power and dedication
With these things we'll all go far
A little magic, a love potion
'Cos every mans' woman is a star

We came, we saw and grew stronger
We came, we saw and grew stronger

A star gazer, a dream maker
Won't let it slip thru my fingers this time
My one ambition, my one and only
Don't wanna be told where to draw the line

We came, we saw and grew stronger
We came, we saw and grew stronger

We came and grew stronger
We came
