Love is a Lonesome River

Glen Campbell

On a street in some big city lives the girl I love so well She left me for another now there's nothing much to tell As I try to fit my life in a different mode I find That love is a lonesome river running through the lonesome mind I took a plane to back when I was just a child that played Time sure changed this old town oh it's not the same today As I try to meet old friends none do I find Cause love is a lonesome river running through the lonesome min d

There's trees along this river that are overgrown with pines
There's pools along this river where the sun will never shine
As I look into my heart and count my loss I find
That love is a lonesome river running through the lonesome mind
Yes love is a lonesome river running through the lonesome mind
