

She Understands Me

Glen Campbell

She understands me and she cares how I feel
Cause she's always there to hold my hand
Somehow she knows it when this old world's got me down
Yes she understands her man
We've seen the rain and the sunshine together
Many times she's watched me stumble and fall
And she's always there by my side when I need her
Through the good through the bad through it all
And though how it hurts me when her dreams don't come true
When I can't give her all the things I planned
But Lord it ain't easy and she knows that's light
Thank God for my woman she understands
