

Better Off Here

Glen Phillips

I had a lot that I thought I needed but
Give it up for you, give you what I got
It's time that you know it,
(Fucked up and I'm going)

Back to where I came from
Place I got my name from
It won't be the same as it was in those years
But I'm better off here

There's nothing the places I've been in
I'm nothing better, I'm just a little differnt
Somethings missing, (wasn't really leaving)
Missed the rush of complication
I want the hush of queit inspiration
It's my life and I know it
I'm getting out and I'm going

Back to where I came from
Place I got my name from
It won't be the same as it was in those years
But I'm better off here
It can't be the same as it was in those years
But I'm better off here

What did you want me to be
It won't, won't make a differance
And it's not important to me
Woah, it won't make a differrance

You can have your little world
But I'm finally clear
Better off here

I had a lot I thought that I needed
Give it up, now I'm leaving
It's my life and I know it
I'm getting out and I'm going

Back to where I came from
Place I got my name from
It won't be the same as it was in those years
But I'm better off here
It can't be the same as it was in those years
But I'm better off here
