

# Black Light

Glenn Hughes

You fly with the locust Down in the western sky line But you're  
out of focus In every way you design

The crux of the matter You've taken the life of my friend Her d  
reams you did shatter They're takin' you down to the end

You always wanted to be right You never wanted to stay You are  
a soul burnin' too bright Your guardian angel did say

Into the black light, you will go Into the black light, you wil  
l know

I hope you can hear me You lie alone in your cell And you never  
be free You live in your own private hell

I know Johnny Lennon, is watching the curse of your fate There'  
s too many people Too frightened to speak Of your hate

You are a soul burnin' too bright Your guardian angel did say

Into the black light, you will go Into the black light, you wil  
l know

You always wanted to be right You never wanted to stay You are  
a soul burnin' too bright Your guardian angel did say

Into the black light, you will go Into the black light, you wil  
l know

Into the black light, you will go
