

# Love Communion

Glenn Hughes

I wanna get inside your head You oughta know, it's time to grow  
We gotta try, try to justify This sacred testament I got to vent

Peaces, we can love inside the Garden of pure light It sure feels right

Can't you see that life's not jaded Never been so elevated Underneath the willow tree That is where I want to be

Time, I been keepin' time to visualize The role that I do play  
Ain't no crime, I was miles away I tried to let you know we reap and sow

Shape that love communion In my mind Don't you wanna get back to the grind  
Shape that love communion in my soul Only takes a second I been told Won't you shape that love communion

Let me connect you, it's all that I want I will recite from memory  
It will direct you, it's my belief In like a thief, then I'm gone
