

Never Say Never

Glenn Hughes

just wanna start a revolution Little sister like you've never seen
I'm your distant near But close relation Always dressed in
white Upon the screen

And you will go far, you will be a star

I don't wanna take a long vacation Never had the time to pump the
gas

And you will go far, in your big black car

How did it get to that?

The bass it don't lie, so never say never It's making me cry so
never say never

Rather taste the honey than the morphine Like the way it feels
upon my tongue Paint a perfect picture to the school dean Gotta
play in Memphis all night long
