

Something To See

Glenn Lewis

I was thinking you when me could start again, fulfill a dream
Read that somewhere we would find a paradise
Walls of change have clearly fell, showing loves cry out for help
But if you only try with me, you'd see that we

Should be trying to find a cause for our own flaws
But know that just to be with you
In a love that's truly free
That could be you and me

It'd be something to see
'Cause you know we're too far gone
To ever be the same way we've been so long
It'd be something to see, we can make it if we hold on
The way it should be with love leading us along

A love so beautiful to me, now's the chance for all to see
All you need is to believe, love's the key
With peace between us, you and me
Then a crystal city's where we could be
Then there'd be no mystery, just free to be

Only tryin' to find a cause for our own flaws
But know that just to be with you
And in love was all it was
And should ever be become

It'd be something to see
'Cause you know we're too far gone
To ever be the same way we've been so long
It'd be something to see, we can make it if we hold on
The way it should be with love leading us along
With love leading us along

Ooh ooh I love
Loving, la la la

It'd be something to see
'Cause you know we're too far gone
To ever be the same way we've been so long, so long
It'd be something to see, we can make it if we hold on, hold on
The way it should be with love leading us along

Love leading us along
You and me, no no
Something to see
