

# Black Parade

Globus

Now have we seen this light for the last time  
They're turning back the clock and we won't survive  
On just hope this time  
They slowly break us down from the inside  
And force a way of life we don't recognise  
And free will has died  
We take our breath for the last time  
We'll give it one more cry before they burn a hole  
In our hearts again

We saw it coming, this Black Parade when will it end  
Oh you and I both know, this Black Parade on fear depends  
We can fight it but we can't pretend

khaste nasho, parvaz kon (don't get tired, fly)  
ey khaste mooned too ghafas (Hey, the tired one in the cage)  
Parvaz kon ta ke manam ba to ham avaz ham nafas (Fly until I sing and  
breathe with you)

The turbans reign supreme over virtue  
You cannot lift your veil or speak the truth  
They promise nothing but keep that bar held high for you

We saw it coming, this Black Parade will forge ahead  
Oh you and I both know, this Black Parade  
The demon's edge  
We will fight it with our dying breath

And now they've pumped the masses full of rage  
We're going to light some fires  
We're going to burn the stage  
The lightning is coming, the marchers will fall  
Fall

khaste nasho, khaste nasho, sokooteto faryad kon (Don't get tired, do  
n't get tired, shout loud your silence)  
ta mano dari, khodeto az in ghafas azad kon (Until you've got me, fre  
e yourself from this cage)

We saw it coming, this Black Parade will meet its end  
Oh you and I both know, this Black Parade, it's good as dead  
We will fight until the streets turn red  
This Black Parade will meet its end  
Oh you and I both know, this Black Parade, it's good as dead  
We will fight until the streets turn red

faryad kon (shout)  
parvaz kon (fly)  
We will fight until the streets turn red
