

So Good

Gloria Estefan

Just look the other way, I know
If I could resist I would
Be smart and just walk out the door
Or at least I know I should
The minute that you touched my hand
I knew without a doubt
That you would have the upper hand
But that's what life's about
And it feels so good
You make me feel so good

Can't wait to get you all alone
To see what lies ahead
I'll leave behind my comfort zone
And kiss your lips instead
I wanna feel how warm it gets
When your body's close to mine
I wanted it the day we met
And you wouldn't leave my mind

That it would feel so good
You make me feel so good

You can try to analyze it
Or just accept how you feel
Pinch yourself, look in the mirror
Baby this is real
You should feel so lucky that you're
Only one of a few
That makes me forget everyone else
And wanna be with you

You make me feel so good
