

You Can't Walk Away From Love

Gloria Estefan

Here I am before you
Naked in your eyes
Hoping with each kiss
You will never see through my disguise
I have been made to believe
That no one could love me for me
The good and the bad
First to the last
No matter the cost
No matter the past

Your eyes only see what they wanna see
Your heart makes the truth what you want to believe
Passion turns pain into ecstasy
You can't walk away from love
Loving you more than I do myself
Revealing the things I would never tell
Daring to risk even life itself
You can't walk away from love

There will be no other
Lips against my skin
No need to regret
How can pleasure ever be a sin
I tried to make you believe
You meant almost nothing to me
Through all the lies
Chasing a dream
Finding at last
The woman in me

Your eyes only see what they wanna see
Your heart makes the truth what you want to believe
Passion turns pain into ecstasy
You can't walk away from love
Loving you more than I do myself
Revealing the things I would never tell
Daring to risk even life itself
You can't walk away from love
