

Fist of Steel

Gloryful

Thunder, thunder, night in stripes
This is the sound of our gloryful ride
Fire, fire, we're running hot
Avalanche of steel that you'll never stop
Fighting the enemy, across the land
Unleash the power that no one could bend
Blessed with a flame, that burns in your heart
Bang all your heads to the sound

Raise your fist, all for one
Fist of steel, one for all

Unbelievers who won't understand
Don't listen to them, you know that you're right
As long as you burn you won't tear apart
A light in the shadow will fight the dark

Are you with me? We are! Joining the fight
United we stand as one, together we ride
Our hearts know we're right
Iron believe - and true
You're not choosing metal, metal chooses you!

Fire, fire, melting steel
Forging the iron to your destiny
Unleash the power, sharing no tear
Our free will is the weapon they fear
Calling my brothers, we're ready to fight
Be sure there's always a friend by your side
Thunder, thunder, flashing down
Eternal metal will take the crown
