

Freeride

Glucifer

Time to get up, another day
Turn the clock and look away
Sit around doing none
Sit around till the day is done

You're hanging out at the turn
Stuck again, you should burn
You're hanging out wasting time
You hang around, say you wait for the line

You have a freeride coming better
Pick up the call, you have a freeride
You have a freeride coming
So you better get on, you have a freeride
Yeah, yeah, you have a freeride

It is good when it is numb
Waiting for tomorrow never comes
And if it does who cares
The days are all the same around here

Sleep 'em away between dirty sheets
It takes a miracle to get on your feet
Things move just a little too fast
You take a ride, take a ride in the past

You had a freeride coming but you never got on
You had a freeride
You had a freeride coming but you missed the call
You had a freeride
Yeah, yeah, you have a freeride

Oh my my, now it feels so cold
Had it coming but you missed the call
Oh my my, now it feels so cold
But had it coming but he missed the call

Oh my my, now it feels so cold
He had it coming but he missed the call
Say oh my my, now it feels so cold

You had a, you had a
You had a freeride coming but you never got on
You had a freeride
You had a freeride coming but you missed the call
You had a freeride

You had a freeride coming but you never got on
You had a freeride
You had a freeride coming but you missed the call
You had a freeride
You had a freeride
