

## crash with me

Gnash

Crash with me  
Crash with me  
Crash with me  
Fall asleep

On the 101 at 1:01 and on the run  
From the demons in the soul inside the monster you've become  
And I should've trusted judgment, something's up and jumped from jump  
'Cuz you gave me all the reasons to be leavin', love is love, yeah

This don't feel right no more, no sleepless nights no more  
I don't need strife no more, I don't need life no more  
Baby I know it's late, but I've got one more thing to say

Crash with me  
Crash with me  
Crash with me  
Fall asleep

On the 1 at one because the one that was the one  
Won the game but lost my love so I was gone before the sun  
And I swore that I was safe from all the damage to be done  
Heavy my eyes totaled tons, met early demise, hit and run

Driving, flying thru these red lights and all I see is headlights  
And you gave me those red lights, those almost kinda dead lights  
I'm driving into my fate, I'll make loving you my last mistake

Crash with me  
Crash with me  
Crash with me  
Fall asleep

Our car crash hearts felt perfect till the impact  
And everyone just watched, and karma is the whiplash  
Please know I always loved you, all I wanted was your hand  
I'm gone but dreaming of you

I hope you understand  
I hope you understand  
I hope you understand
