Disposable  
Didn't know we were so

Back when we started out  
I was hoping, thinkin we could work it out  
We were picture perfect  
And i never ever missed a moment  
Never no doubt  
And i tell you tell you tell you  
How much i miss you  
Thinkin that'll solve all your other issues  
So i'm lining up the shot and pull the trigger down  
Life is kinda lifeless when you're not around  
Packing up and leaving to a different town  
Distant in the distance naw i mean it  
Just return the crown  
Every night i'm dreaming and i'm screaming  
That we're headed downtown to lil toyko  
So hit me let me take you now  
Maybe a day like that can change it all  
I mean like, who else could I call  
Capture all these moments then we threw em away  
Little prince and princess to the grave

Going going gone  
You're moving moving on  
It's unfair for you to care only some of the time  
I thought you just needed air and then nothing was fine  
I know lavender is your favorite smell and color  
And how your hair feels whenever you miss a shower  
And how our cranes hang in your koreatown tower  
And all your deepest thoughts when you're in your darkest hour  
If you didn't love me then you leave me alone  
And i know it's probably wrong for me to answer the phone

But i'd rather make you smile then leave you lonely at home  
Cause it kinda hurts to care but it hurts worse to have you gone  
A pictures worth a thousand words  
Collage them up to make them hurt  
Read you bedtime stories till we're both laying still  
And use these memories for the words of my will
