

## oxytocin

Gnash

Get your dose of oxytocin  
Take this hit to show emotion  
Feel it like you've never felt before  
In the dark and in the open  
Your not one who knows devotion  
Feel it like you've never felt before

So apart when we're together  
From the heart of your forever  
From the start I knew you better  
But I fell for you and I feel for you  
When it's night and the only  
Lights are the ones we know  
Past scars like a knife and it cuts  
Right through your lung  
Found a tab on my touch and  
It ends up on your tongue  
What I want from you  
Is you to want me too

Get your dose of oxytocin  
Take this hit to show emotion  
Feel it like you've never felt before  
In the dark and in the open  
Your not one who knows devotion  
Feel it like you've never felt before

I don't like my own hands touchin' anymore  
For a moment I think it's you and then I want more  
In the morning I still roll over to kiss you on the forehead  
I've never been more dead  
I didn't mean to force it  
Everything that's supposed to be bad makes me feel so good  
I know its time to go and I coulda shoulda would  
But my little druggy baby your touch is what can save me  
So love me like my lady and I'll hold you all I'm saying

Get your dose of oxytocin  
Take this hit to show emotion  
Feel it like you've never felt before  
In the dark and in the open  
Your not one who knows devotion  
Feel it like you've never felt before
