What If You Don't

Go Radio

I'm building my own cell tonight
And I will never make a key
It's just me and the dark
Alone here with my heart
And won't you come and set me free

And you and I we have a history
And not much here outweighs the pain
When every mile got in the way
We thought the fear was self contained
Let's say we both assume the blame

Cause what if my stars fell from the sky
And what if they landed in your eyes
Would it be all right?
When all of my time has gone away
I wanna say I've left more than days
But what's on my mind tonight
Is what if you don't
Yeah, what if you don't

There was a time I had a symphony
And it played love to me for days
Then all at once I heard the strings
Out of tune, and out of key
It seems there's no song here for me
No not for me

And what if my stars fell from the sky
And what if they landed in your eyes
Would it be all right?
When all of my time has gone away
I wanna say I've left more than days
But what's on my mind tonight
Is what if you don't
Yeah, what if you don't

I see the night
It's coming for me
To take you away
It's here as a thief
And I know that I'm scared
And from down on my knees
I'm asking relief
From what if you don't
Yeah, what if you don't
