

Interference

God Module

Someone try to show me the way
To where love does not decay
Where
I can see forever
I can see the truth
I can see what's real
And what's wrong inside of you
Can you feel emotion
Can you lose control
Can you make me say the things
No one else should know

Brain-dead you're force-fed
With our interference
Absent to madness
With holes in your head
Voiceless you're screaming
Deny that you're dreaming
As the sky falls
And time tears your life apart

Deception
My objection to this
Is that there's no where left
For us to exist
And when I try
I still can't feel
There's nothing new
You're so unreal

Obsession
No direction to this
And we still can't find
A place to exist
You read my mind
There's nothing to feel
There's nothing new
There's nothing real
