

## Let's Go Dark

## God Module

It's true some things have changed  
What we've opened cannot be closed  
In the strangest ways  
The lies that we tell  
Are the truths we've been told

No time to decide  
If what you feel is real  
Or just a trick of the mind  
We ascend together  
And turn back the time to never

Let's go dark to see what we find  
Turn out the lights  
And start to lose our minds  
When you can't see it's just a matter of time  
Until they find you  
Let's go dark and rewind the night  
To see what moves when we close our eyes  
Your heart beats in time with their cries  
And stops when they find you

From beyond the grave  
They scream out the answers that we'll never know  
After life after death  
We'll all go blind  
From the things  
That we're shown

No time to decide  
If what you feel is real  
Or just a trick of your mind  
We ascend together  
And let go of our souls forever
