

## Magma

Gojira

Analyze this chemistry  
Producing poison  
And creeping in your veins  
For the love of blood

The poison slowly spreads  
Through the body and the mind  
Close your eyes and drop your things  
Be ready to fly

You are now, high  
In the sun, burn  
You're away, alive  
On the moon, round

After walking all the miles  
Consumed into your bones  
And breathing all the dust  
Of the desert land

I know that all along  
You were doing it for absolution  
It's written in your eyes

You are now, high  
In the sun, burn  
You're away, alive  
On the moon, round

Away  
Just want to fly away, always higher  
Away  
Embrace the light on the other side
