

## To Sirius

Gojira

Now from a solar system  
To another I fly  
I come with life in my veins  
Through darkened space I ran  
I left a struggle behind  
And faced the fear that's alive  
I lost a world and traveled  
Straight across from the sky  
To find the gates of the heart

I come to sirius c  
To learn from you friends of old  
And wish to come into being  
And behold I'm with you  
I am ready now to go  
The distance and even beyond  
Recover all my forces  
All the strength of the world  
And feel the light into me

From the strenght of god  
We go to the power of goddess  
This place is a throne  
For brightness  
The age of war is over

For god's sake  
They have never heard of you  
"You'll never reach  
This master race"  
Our force sickening  
Killing the time  
Human laws  
Already slayed many lives

There was a streak of madness  
But now I know  
I see its now the only truth  
The scars in me are opened  
Won't you please call me beyond

Crave affection love and courage  
Being courageous  
And flying instead of  
Falling down  
Follow these instructions  
I've been given  
In this dream awake

There is no goal to reach now  
Leviathans  
No complaint at all  
Dolphins from upper space  
Are in front of me  
In present they dwell

This is my way

I've found my home  
My state of real  
There is no goal to reach  
This is my way
