

## My Baby Ruby

Golden Earring

I sit here and I'm drinking  
Drinking away her name  
But God knows if it will help  
Until now she still remains  
And every glass and every hour  
Deeper I will sink  
So wondering if it will help  
Come on buddy, buy me a drink

Think about my baby, think about her right now  
Come on give me the bottle, the bill don't talk about it now  
Think about my baby, I think about her right now  
The moment I knew she was living, I had to get her anyhow

My baby Ruby, she's groovy  
And every time I call her name  
She looks at the sky, for me no eye, oh yeah
