

Until You Came Along

Golden Smog

Sometimes you're up, sometimes you're down
Don't let your feet ever touch this ground
Comfort me in times of doubt
In deep despair, lies and cares and a falling out
With my friends I used to follow
Nearly everybody's daughter
That's until you came along
In a bar-room patrons singing
But I just sat there drinking
That's until you came along
Your star-crossed eyes and your troubled mind
Seems you were left just for me to find
Sweet lady lay your hands in mine
Upon my face laid to waste by years of wine
With my friends I used to follow
Nearly everybody's daughter
That's until you came along
In a bar-room patrons singing
But I just sat there drinking
That's until you came along
Sweet lady lay your hands in mine
Upon my face laid to waste by years of wine
With my friends I used to follow
Nearly everybody's daughter
That's until you came along
In a bar-room patrons singing
But I just sat there drinking
That's until you came along
With my friends I used to follow
Nearly everybody's daughter
That's until you came along
But the darkness just got darker
This heart of mine got harder
That's until you came along
