Decision

Goldfinger

This time you should know Like the first time that I saw you there alone Like the first time that I knew you were my own

The way you made me feel Like I was something that You couldn't live without Like I was someone that You couldn't be without

Something came in between us Something made a change in you What can I do?

So you made your decision
I guess it's you that I'll be missin'
I lie alone in bed just wishin'
That I had been the one
That I had been the one

This time you should know The way you made me feel So helpless and alone Erase the memories Of all we've ever known

Something came in between us Something made us break in two What can I do?

So you made your decision
I guess it's you that I'll be missin'
I lie alone in bed just wishin'
That I had been the one
That I had been the one

Now I think I'm goin' crazy Now you're stuck inside my head I don't ever wanna feel this way again

When you look in the mirror Does it all seem clear to you? Have I been used?

So you made your decision
It won't be me that you'll be missin'
I lie alone in bed just wishin'
That I had been the one
That I had been the one

So you made your decision
I guess it's you that I'll be missin'
I lie alone in bed just wishin'
That I had been the one
That I wad the one
