

Crystalline Green

Goldfrapp

Here we come, driving down
Deep and wide, settle down
On the beach, get the sun
Coming down, get and warm

Turn it down, settle down
On the beach, get the sun
On the down, jealous day
You can lounge, turn it down

I wanna waste it playing
Spend all our day in a dream
Crystalline green watch it rolling
Feeling the weight of the sun

Here we come, driving down
Deep and wide, blue and green
Breathing in, come alive
Here we come, with the stars

Letting slip in through my fingers
Little rings float in your eyes
Try forget who are you now
Stare into space, watch the sky
