Crystalline Green

Here we come, driving down Deep and wide, settle down On the beach, get the sun Coming down, get and warm

Turn it down, settle down On the beach, get the sun On the down, jealous day You can lounge, turn it down

I wanna waste it playing Spend all our day in a dream Crystalline green watch it rolling Feeling the weight of the sun

Here we come, driving down Deep and wide, blue and green Breathing in, come alive Here we come, with the stars

Letting slip in through my fingers Little rings float in your eyes Try forget who are you now Stare into space, watch the sky
