

# Lights

Goo Goo Dolls

I know it's getting dark outside  
The stars are gone tonight  
And with them all my pride

I see your shadows on the wall  
But lover's voice still calls  
And echoes through the halls  
But you're not here

I keep leaving the lights on for you  
Every night since you've been gone  
I keep leaving the lights on  
'Cause I know you're coming home  
I've been keeping this fire going  
Every night since you've been gone  
Feel it burn but I've never been colder  
When are you coming home

I tried, I tried to fall asleep  
The phone right next to me  
You called me in my dreams  
Your voice was sweet  
But still too real for me

I keep leaving the lights on for you  
Every night since you've been gone  
I keep leaving the lights on  
'Cause I know you're coming home  
I've been keeping this fire going  
Every night since you've been gone  
Feel it burn but I've never been colder  
When are you coming home  
When are you coming home

I stumble through the dark alone  
Without you  
I hear your voice but it's too real

I keep leaving the lights on for you  
Every night since you've been gone  
I keep leaving the lights on  
'Cause I know you're coming home  
I've been keeping this fire going  
Every night since you've been gone  
Feel it burn but I've never been colder  
When are you coming home  
When are you coming home  
When are you coming home
