

# One Night

Goo Goo Dolls

God, you still amaze me  
When you speak to me that way  
Oh, the sound of your voice  
The look in your eyes, you stand there in your grace

You told me that the scars you bear  
Are beautiful and real  
So turn the lights back on again  
All to see the things you feel

And we've got one night  
To let the whole world know  
Just how perfect we could be  
Just close your eyes and then you'll see

We've got one night  
To let the whole world know  
Forget about the falling stars  
Tonight we'll show them who we are, we are

Feel it when you're near me  
And I know when you're not there  
Numb on the edge and so alone  
And no one seems to care

But you reach out and pull me back  
And love me 'til I'm free  
All the joy in my life I feel like  
I've lost you, see inside of me

And we've got one night  
To let the whole world know  
Just how perfect we could be  
Just close your eyes and then you'll see

We've got one night  
To let the whole world know  
Forget about the falling stars  
Tonight we'll show them who we are, we are

Life's a song I'll sing  
And it doesn't matter anymore if anyone is listening to me  
'Cause you move like light  
You send all to me, tend to pull me through my life

And we've got one night  
To let the whole world know  
Just how perfect we could be  
Just close your eyes and then you'll see

We've got one night  
To let the whole world know  
Forget about the falling stars  
Tonight we'll show them who we are, we are
