## Slaughterhouse

## **Goo Goo Dolls**

And if the accident will, well we'll both fade away And I'll leave you still, and we will both be safe

Say you're safe, your life will pass away Only to be saved, by another's lonely stay

All the flowers I can grow and all the children's tears And everything I know will vanish with the years

Say you're safe, your life will pass away Only to be saved by another's lonely stay

And if the accidents will, well we'll both fade away But the trees will grow, until my dying day

All the flowers I can grow, and all the children's tears And everything I know will vanish with the years

Say you're safe and your life will pass away Only to be saved by another's lonely stay
