Life Can't Get Much Better

Good Charlotte

One promise, we made it We said we'd never break it Don't look down, be honest Tell me has it changed?

One life that, we're living We're somewhere unforgiven Don't look down, be real now Tell me has it changed?

I just wanna see you laugh again

Life can't get much better Let's just stay together These scars are tokens of promises broken

Life can't get much better Let's just stay forever We've got to hold on We waited so long

If I knew we'd end up this way Do you really think I wouldn't have tried? If I knew it would break us down Do you really think I would've lied?

Now I try to forget the past But it's all that's on my mind I'd give it all if I could get you back I'd give it all if you were mine

I just wanna see you here sometime, 'cause

Life can't get much better Let's just stay together These scars are tokens of promises broken

Life can't get much better Let's just stay forever We've got to hold on We waited so long

Don't give up on us, on us Don't give up on us Yeah

Tell me that you meant every word you said In the text you sent I was going to bed The girl with the blue eyes, with the blue eyes It ain't right it was fucking with me last night

Life can't get much better Let's just stay together These scars are tokens of promises broken

Life can't get much better Let's just stay forever We've got to hold on We waited so long

Tell me that you meant every word you said In the text you sent I was going to bed The girl with the blue eyes, with the blue eyes It ain't right it was fucking with me last night

Life can't get much better Let's just stay together These scars are tokens of promises broken
