

# Life Changes

Good Charlotte

Let's go now, it's open season

Going through these life changes  
Gotta keep my feet moving  
I'm looking up at the sky  
Gotta keep my eyes open  
Gonna keep my mind racing  
I keep on trying to fly

We almost died  
Learning how to survive the fast life

You know they say that nothing lasts forever  
You know they said we'd never stay together  
It's a long way down, can't turn back now  
Going through these life changes  
Going through these life changes

Let's go!

Yeah we always try to stand up to the lies  
We said we'll never give up 'til we die  
And try to help our friends, we learn to live again  
We'll never say it's over 'til the end

We almost died  
Learning how to survive the fast life

You know they say that nothing lasts forever  
You know they said we'd never stay together  
It's a long way down, can't turn back now  
Going through these life changes  
Going through these life changes

Don't you know that life changes?  
You know that love changes  
The pain, it rearranges  
Best friends become strangers  
Don't you know that life changes?  
You know that love changes  
The pain, it rearranges  
Best friends become strangers  
So you get up and shake it off  
Smile at everyone you meet  
Put your best foot forward, chip on your shoulder  
It's like you can't be beat  
It's like we can't be beat

Going through these life changes  
Going through these life changes  
Going through these life changes  
Going through these life changes

You know they say that nothing lasts forever  
You know they said we'd never stay together  
It's a long way down, can't turn back now  
Going through these life changes

Going through these life changes  
Going through these life changes  
Going through these life changes  
Going through these life changes  
Going through these life changes
